

**NEW**

# Famjet M9

High Resolution printer equipped with HP TIJ technology  
Inks for porous, semi porous and non porous substrates

## The best solution for multi-head applications:

**Printing height** up to 50.8 mm in a single image or with different messages.

**High resolution printer** for porous and non porous substrates including cardboards, plastics, metal, aluminum and many other materials.

**Designed** also for customers who have complex coding requirements.

**The advanced communication protocol** makes this printer ideal for remote operations and for high-speed serialization of 2D codes perfectly readable by optical vision systems.

**No maintenance** and spare parts required.

**Compact design:** Easy to install and integrate in industrial environments.

**The 9" touch screen display & integrated Android software** allows direct data entry (texts, counters, autodata, logos, barcodes, 2D codes etc.) and ensure a simple and intuitive execution of the activities.

**New I/O port** to connect an external warning levels lamp, automatic printing message selection, automatic reverse printing and more...

# Technical Specifications

## Famjet M9

**Print height:**  
With single printhead up to 12,5mm  
with quadruple printhead up to 50mm

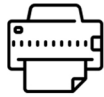

**Display:**  
Touch Screen 9"

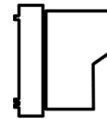

**Resolution:**  
up to 2400 dpi

**Printing capabilities:**  
Text, variable informations  
alphanumeric characters,  
logos 1& 2D Barcodes

**Printing Speed:**  
130 m/min @ 150 dpi

**Consumables:**  
Disposable hp45  
and 45Si 42ml  
cartridges

**User Interface:**  
USB, I/O, Ethernet,  
Wi-fi connection (optional)

**Voltage:**  
AC:110v-220v  
50-60Hz 1A: 15v, 2A

**Memory:**  
16GB,  
32GB optional
